

**APPENDIX (37 C.F.F. § 1.192(c)(9))**

**CLAIMS AFTER AMENDMENT FILED HERewith**

1. A mechanical connection comprising:
  - a sheet metal casing having a base part, a pair of side walls and a rear wall such that when assembled, each side wall adjoins one side of the rear wall, each side wall having a top rear corner in a region displaced from the base part and adjacent to where the side wall joins the rear wall when assembled, the base part, the pair of side walls and the rear wall all being formed from a single sheet-metal part;
  - a cutout formed in each of the side walls in the region of the top rear corner;
  - an angled section formed on the rear wall; and
  - hook-like extensions provided at sides of the angled section, which hook-like extensions snap into the cutouts of the side walls when the rear wall is swung into position.
2. The mechanical connection as claimed in claim 1, wherein the hook-like extensions are sloped such that the width increases from a front to a back of the hook-like extensions.
3. The mechanical connection as claimed in claim 1, wherein the hook-like extensions are formed integrally with the angled section
4. A casing comprising:
  - a base, a pair of side walls and a rear wall all formed from a single sheet of sheet-metal, such that when assembled each side wall adjoins one side of the rear wall;
  - a cutout formed in each of the side walls in a region where the side wall adjoins the rear wall; and
  - a pair of hook-like extensions extending from the rear wall at positions corresponding to the cutouts such that when assembled, each hook-like extension snaps into a cutout.
